Electric straw trolley

You can effortlessly transport large straw and hay bales with this electric straw trolley. You yourself can stand on the robust operator plate and thus easily operate the electrical straw trolley. It is easy to use. Strawing-up your stables will be much faster and more efficient.

Silent
Being electric, the straw trolley makes almost no noise. Your horses will not be startled as you ride past. It is fitted with a powerful battery which runs for at least 8 hours.

Payload
The large loading area of 200cm or 250cm x 100cm allows you to transport up to 600kg of straw or hay quickly and safely. This makes this straw trolley particularly suitable for larger equestrian companies with many stables.

Eigenschappen
