Electric wheelbarrow

Electric wheelbarrow
The electric wheelbarrow (600 litres) makes mucking out more efficient and less heavy. You can wheel the fully loaded wheelbarrow to the manure heap with the greatest of ease. You won't strain your back and you can lift the electric wheelbarrow so you don't have to walk.

Double-hinged tilting skip
The double-hinged tipping bucket makes the electric wheelbarrow very easy to empty. Once you reach the manure pit, you can easily tip the tipping bucket over by hand. It stands firmly on the four pneumatic tyres and is well balanced.

Battery life
The 24V batteries (2 units) last up to 4-5 hours. That is enough time for even the largest stables to muck out all of them. In addition, this electric wheelbarrow is larger than the normal wheelbarrow, allowing you to muck out several barns before it is full.

No noise pollution
Horses don't like loud noise, you probably don't either. It is therefore good to know that it has a battery that makes virtually no noise. This is a big advantage compared to an electric wheelbarrow with an engine or petrol or diesel. This electric wheelbarrow is so quiet that your horses won't even notice you passing by while mucking out.

Large enough for 4 stalls
With a generous size of 190 x 110 x 80 cm, the electric wheelbarrow is big enough to fatten as many as 4 stables. This saves an enormous amount of time as you no longer have to push your smaller full wheelbarrow to the manure pit so often. You manure 4 stalls and send it out of the stall and lift it yourself by standing on the platform. In terms of width, the wheelbarrow is designed so that it can easily be driven

through horse stables.

Forward and backward
The electric wheelbarrow has two gears: forward and reverse. How fast the electric wheelbarrow drives is up to you. By pulling the handle towards you, you determine the speed at which you or your barn worker very relaxedly drive to the manure pit.

Besides the electric wheelbarrow, we also have a electric feed wagon and a electric straw truck.

Specificaties

Content	600 litres
Dimensions	190 x 110 x 80 cm
Weight	120 kg
Batteries	2 pieces - 12V gel batteries
Duration of use	4-5 hours
Drive	950W - 24V electric motor
Gears	1 forward, 1 backward
Payload	Max. 400 kg
Pneumatic tyres	4
Noise level	Very quiet
Operation	Easy

Van stal tot rijbaan, betrouwbare oplossingen voor elke paardenhouder
