Wheelbarrow - 430L

With this wheelbarrow, you can transport as much as 430 litres. Ideal if you need to transport large quantities of manure, water or straw from a to b at the stable. The bin is made of polyethylene and the frame is galvanised. As a result, this wheelbarrow can definitely take a beating.

The comfort of two wheels
Because the wheelbarrow has two wheels, it cannot tip over. So whether it is empty or completely full, you can even steer the wheelbarrow with one hand. Handy if you need to take a pitchfork or broom to the next stable, for example.

Strong wheels
As this wheelbarrow has 430 litre capacity, it has strong 4-ply pneumatic tyres. It features steel rims with ball bearings. This makes the wheelbarrow very suitable for daily use, both indoors and outdoors.
