Feed trolley

This metal feed trolley is a must for any stable. It has a 350 litre capacity that is divided into 3 compartments. The feed cart is made of steel and has 3 wheels, 1 of which is a castor wheel, making it easy to manoeuvre around your stable.

Transporting multiple feed types
The division into 3 compartments allows you to carry several types of feed. This allows you to feed all horses in one round with, for example, pellets, oats and muesli.

Locked away from pests
The feed trolley is fitted with 2 lids. This keeps everything well sealed and prevents pests from getting to your feed.

Accessory
Supplied as standard is a tailor-made tray where you can store your supplements.
