Jump trolley

If you have jumps then you know that it is always quite a job to get everything back in the right place. This manually-operated jump-trolley makes it a lot easier. The wide wheels mean that you can easily transport the wings and poles through the sand in your arena. Chances are that you will use this jump trolley to store your jumps all year round.

Tow bar and tow hitch
The tow bar is fitted with a handle with tow eye. The rear of the jump-trolley is fitted with a tow hitch. That is especially handy if you also have to take a pole-carrier with you. beam trolley should take with them.

Wide wheels/wheelbase
The jump-trolley has a dimension of 350 x 150 cm and is fitted with a robust turntable. This makes the trolley very stable. The wide pneumatic tyres contribute to this and make it light to manoeuvre.

Eigenschappen

Specificaties
