Purple Spreader

The Purple Spreader is an add-on component for mini-loader or forklift truck to spread the straw in stables. This straw machine takes a lot of work off your hands. Yard work is a lot faster and the machine saves you a lot of hard work and energy. Furthermore, a lot less dust is generated with this straw-spreader and that is substantially better for the health of horses and people. The simple operation means use of the machine is very user-friendly. The Purple Spreader leaves a wonderfully full straw bed. The machine is suitable for large bales of straw and machines with a hoisting capacity of 700kg min.

Eigenschappen

The benefits

Straw remains long
Little dust
Simple operation
Less labour

Specificaties
