Track edge plough

The Track edge plough is specially designed for levelling the track formed by horses along the edges of the arena. With the recess along one side, the track edge plough is extremely suitable for the Safety Wall. The track can be quickly and easily levelled without having to start up tractors or any other motorised machines.

Features

Ideal for quickly smoothing the side of the edge of the track
No need to remove jumps during use
Quick and easy
Suitable for all bases

Eigenschappen

Specificaties

Suitable for	All bases
