Arena Leveller FLC

The FLC arena leveller is especially suitable for the perfect levelling of the arena or your arena track. The cultivator tines are adjustable in depth and ensure the surface is loosened if necessary. The levelling blade positioned just behind the tines, grooms the surface. The bent rear blade compresses the surface. The spring-loaded tines rough up the surface slightly.

Models
- Arena Leveller FLC One (behind tractor - 1.5m to 2m working width)
- Arena Leveller FLC Duo (behind tractor - 3m to 6m working width)
- Floor leveler FLC Duplex (behind tractor - 2.3m working width)
- Arena Leveller FLC AHK-S (behind quad - 1.25m to 1.45m working width)
- Arena Leveller FLC AHK-XL (behind loader/shovel - 1.5 to 2m working width)
- Arena leveller FLC 2in1 (based on Kioti ATV - 2m working width)
