MaXuSS Pro Edition

MaXuSS Pro

The MaXuSS solarium equipped with additional side modules. 6 modules, each with 2 extra lamps and 1 fan, are placed on the outside of the solarium. In total, an additional power can be placed between 1200 and 3000 watts of infrared.

The solarium is finished with rounded edges only, eliminating the risk of injury to your horse. The lamps are placed higher than the solarium's surfaces, minimising the risk of contact with the hot IR lamps. By using a heat-resistant plastic, placing the lamps in aluminium holders and reusing the residual heat, a very high efficiency can be achieved.

Eigenschappen

Specificaties

Technical specifications	MaXuSS Pro
Lamps	
100-watt IR	12
150 W IR	
175 Watt IR	
250 Watt IR	
Total IR power in Watts	1200
Fan	
Number	6
m3/h	540
Automatic at approx. 30 C	
Connected load	
Connection voltage	1-phase + N + PE 230V 50 Hz

Fuse with ... Ampere	6
Power consumption Watt	1400
Material and size	
Modules	Heat-resistant plastic
Top colour	Dark green
Bottom colour	Silver grey
Lamp fixture	Aluminium
Porcelain fitting	
Heat-resistant wiring 180	
Suspension	Steel
Dimensions LxWxH	
Weight	20 kg
Guidelines	
Approvals	CE
IP value	IP44
Shape manually adjustable	
Shape automatically adjustable	
Suspension set	Standard
Cable with plug	Standard
Recessed fluorescent lighting	Optional
Electric lift installation	Optional
Control box	Optional

Van stal tot rijbaan, betrouwbare oplossingen voor elke paardenhouder
