## Electric lift

We offer three different models of electric lift systems. This is ideal when there are different shoulder heights in the stables. The lift can also be used to raise the solarium to a certain height so that the horse can easily walk underneath. The maximum lifting height is 1.5 m. The maximum permissible load is 30/40/60 kg.

Comes with:

Clear operating instructions  
Fixing material for ceiling.  
Surface-mounted control switch with power cord 230V 50Hz  
10 metre cable with connector  
Fixing set for the solarium
