Equi-lizer with FLC leveller

A well-maintained riding surface gives a lot of (manual) work. With our Equi-lizer, maintaining it becomes a lot easier. Thanks to the small dimensions of this equestrian surface rake, it can already pass through a 1.25m passage and is very easy to handle. This also makes it suitable for tracks such as training mills and lunging circles. On the Equi-lizer with FLC leveller, an additional weight is placed at the front to prevent tilting.

Eigenschappen

Specificaties

Engine	13HP Honda E-start
Fuel	Fuel Euro 95
Max. Speed	10km/h
Working depth	6 cm
Tools	Hydraulic
Drive	Tecumseh
Gears	5 forwards, 1 backwards
Lifting device	Hydraulic
Dimensions	120 cm wide
Weight	500 kg
