Arena Leveller FLC One

The leveller is very effective for use on various surfaces and is specifically designed for grooming and levelling fibre/ geopat surfaces and sand surfaces and is manufactured in the working widths 1.5m to 2.5 metres.

This leveller is practically indestructible and its operation is very simple. The basic model leveller has a three-point linkage with an integrated groomer, tines arranged in two rows and a swinging chain harrow. The chain harrow leaves a nice light top-layer. It can be swapped for a FF-harrow, if so wished (closed, compresses more).

Eigenschappen

Specificaties

Working width	160 cm / 180 cm / 200 cm / 220 cm / 250 cm
Working depth	0 to 9 cm
Weight	260 kg / 298 kg / 320 kg / 330 kg / 400 kg
Material	5 mm laser-cut, CNC powder-coated edged steel
Vehicle	Tractor
Required horsepower	Between 20 and 45 HP
